

VALLEY ELEVATOR INC

Services

With 70 years combined experience, Valley Elevator Inc strives to provide competitively priced service and equipment in a professional manner. When working with Valley Elevator, you will not have to wait for salesmen to be called in, approval committees to convene, and mechanics to be dispatched; then wait again as mechanics try to get approvals for parts to make your equipment run correctly. We will listen to your concerns, survey your equipment and have a proposal for repair or upgrade to you within days, not weeks or months. We know what is needed to make your equipment run smoothly and safely.

- All Inclusive Contracts
- Elevator Repair & Maintenance
- Escalator Repair & Maintenance
- Troubleshooting
- State-Required Testing

MODERNIZATION

If your older elevator has recurring problems, perhaps it is time to consider modernizing your equipment. Modernization projects can include not only new machines and controllers to make your elevator more reliable, but also new cab interiors. We install non-proprietary equipment that can be maintained and repaired by any qualified technician. You will not be held hostage by the big company brands' ridiculous prices for replacement parts. We can upgrade your building by upgrading your elevator.

All Inclusive Maintenance Contracts

We offer contracts from "inspection only" or "testing only" to "all-inclusive" which includes all maintenance, repairs, inspection, fire testing and State-required load testing.

It's important to read the fine print of an agreement.

Most elevator service agreements do not include monthly maintenance and support. Ours does. "All inclusive" means just that, we include it all.

TROUBLESHOOTING AND DIAGNOSTICS

We have worked on elevators and other vertical transportation of nearly all brands and of all ages. Our technicians have maintained and repaired elevators in early 20th century buildings to modern computer-controlled elevators in sleek new buildings in San Francisco and the Bay Area, from Sacramento, to Eureka, to Bakersfield to Fresno and all up and down the Valley.

They have the knowledge, expertise and equipment necessary to troubleshoot and diagnose your elevator problems, and to repair them properly—all while being dependable, trustworthy and friendly!

Call us today for your free estimate.

ELEVATOR SERVICE AND REPAIR

We service and repair all elevator brands. With 70 years of combined experience we know how to fix it right the first time.

We service the following elevator brands: Thyssen-Krupp, Dover, Otis, Amtech, Schindler, Westinghouse, Kone, Montgomery, US, Motion Control, Elevator Controls, ERM, Swift, Virginia Controls and others.

Dumbwaiters, Material Lifts, Wheelchair Lifts, Stair Lifts, Manlifts

STATE REQUIRED TESTING

We are fully qualified and licensed to perform all State-required testing, including:

- Five-year full-load tests
- Fire testing
- Annual no-load tests
- Semi-annual wheelchair lift tests
